the Chora of Metaponto 7

The Chora of Metaponto 7: The Necropoleis (1998). Archaeozoology at Pantanello and Five Other Sites describes the animal remains found throughout Metaponto and discusses what they reveal about ancient practices of hunting and herding, domestication, meat consumption, and the role of animals in the economy. Excavators brought to light a Late Archaic farmhouse, evidence of a sanctuary near a spring, and a cluster of eight burials of the mid-fifth century BC. The report includes a comprehensive survey of the animal remains recovered from the site, with detailed analysis of the archaeological, historical, and cultural contexts in which they were found.

The Chora of Metaponto 6: The Roman Countryside at Sant’Angelo Vecchio (2006). This volume is a study of the Greek settlement at Sant'Angelo Vecchio, located on a slope overlooking the Basento River, which illustrates how the Greek countryside interacted with its Romanizing environment. From 1974 to the present, the Institute of Classical Archaeology at the University of Texas at Austin has carried out archaeological excavations in the ancient territory (chora) of Metaponto, now located in the modern province of Basilicata on the southern coast of Italy. The site is especially significant for its well-preserved and documented archaeological remains, which span from the Neolithic to the Late Roman periods. The volume includes a detailed description of the site, a comprehensive survey of the archaeological remains, and a thorough analysis of the evidence for the economic and social organization of the community, with particular emphasis on the role of agriculture, rural settlements, and rural economy in the broader context of the ancient Greek world.

The Chora of Metaponto 5: The Eleusinian Revettion (2004). This volume focuses on the Late Archaic and Early Classical period at Pantanello, a small but well-preserved site located on the southern coast of Italy. The excavations revealed a rich array of material culture, including pottery, sculpture, and inscriptions, which provide important insights into the social and cultural context of the period. The volume includes a detailed description of the site, a comprehensive survey of the archaeological remains, and a thorough analysis of the evidence for the economic and social organization of the community, with particular emphasis on the role of agriculture, rural settlements, and rural economy in the broader context of the ancient Greek world.

The Chora of Metaponto 4: The Sanctuary at Sant’Angelo Vecchio (2002). This volume is a study of the Greek sanctuary at Pantanello, located in the southern coast of Italy. The excavations revealed a rich array of material culture, including pottery, sculpture, and inscriptions, which provide important insights into the social and cultural context of the period. The volume includes a detailed description of the site, a comprehensive survey of the archaeological remains, and a thorough analysis of the evidence for the economic and social organization of the community, with particular emphasis on the role of agriculture, rural settlements, and rural economy in the broader context of the ancient Greek world.

The Chora of Metaponto 3: The Greek Countryside at Sant’Angelo Vecchio (2000). This volume is a study of the Greek countryside at Sant’Angelo Vecchio, located on a slope overlooking the Basento River, which illustrates how the Greek countryside interacted with its Romanizing environment. From 1974 to the present, the Institute of Classical Archaeology at the University of Texas at Austin has carried out archaeological excavations in the ancient territory (chora) of Metaponto, now located in the modern province of Basilicata on the southern coast of Italy. The site is especially significant for its well-preserved and documented archaeological remains, which span from the Neolithic to the Late Roman periods. The volume includes a detailed description of the site, a comprehensive survey of the archaeological remains, and a thorough analysis of the evidence for the economic and social organization of the community, with particular emphasis on the role of agriculture, rural settlements, and rural economy in the broader context of the ancient Greek world.

The Chora of Metaponto 2: The Greek Countryside at Sant’Angelo Vecchio (1998). This volume is a study of the Greek countryside at Sant’Angelo Vecchio, located on a slope overlooking the Basento River, which illustrates how the Greek countryside interacted with its Romanizing environment. From 1974 to the present, the Institute of Classical Archaeology at the University of Texas at Austin has carried out archaeological excavations in the ancient territory (chora) of Metaponto, now located in the modern province of Basilicata on the southern coast of Italy. The site is especially significant for its well-preserved and documented archaeological remains, which span from the Neolithic to the Late Roman periods. The volume includes a detailed description of the site, a comprehensive survey of the archaeological remains, and a thorough analysis of the evidence for the economic and social organization of the community, with particular emphasis on the role of agriculture, rural settlements, and rural economy in the broader context of the ancient Greek world.

The Chora of Metaponto 1: The Greek Countryside at Sant’Angelo Vecchio (1996). This volume is a study of the Greek countryside at Sant’Angelo Vecchio, located on a slope overlooking the Basento River, which illustrates how the Greek countryside interacted with its Romanizing environment. From 1974 to the present, the Institute of Classical Archaeology at the University of Texas at Austin has carried out archaeological excavations in the ancient territory (chora) of Metaponto, now located in the modern province of Basilicata on the southern coast of Italy. The site is especially significant for its well-preserved and documented archaeological remains, which span from the Neolithic to the Late Roman periods. The volume includes a detailed description of the site, a comprehensive survey of the archaeological remains, and a thorough analysis of the evidence for the economic and social organization of the community, with particular emphasis on the role of agriculture, rural settlements, and rural economy in the broader context of the ancient Greek world.
Veii - Elisa Lanza Catti - 2014-01-01

This volume is the first scientific publication of the results of a five-year intensive field survey conducted in the agricultural territory (chora) of a Greek colony in Southern Italy. Over two centuries, nearly 6,000 sites, ranging in date from the prehistoric through the modern periods, were documented in an area of approximately forty square kilometers, resulting in a comprehensive record of the chora’s occupation and settlement over the course of more than a millennium.

The Chora of Metaponto 3 - Elisa Lanza Catti - 2003-10-01

The Chora of Metaponto 3 contains the first scientific publication of the results of a five-year intensive field survey conducted in the agricultural territory (chora) of a Greek colony in Southern Italy. Over two centuries, nearly 6,000 sites, ranging in date from the prehistoric through the modern periods, were documented in an area of approximately forty square kilometers, resulting in a comprehensive record of the chora’s occupation and settlement over the course of more than a millennium.

New Directions and Paradigms for the Study of Greek Architecture - Pia Guldager Bilde and Vladimir F Stolba - 2005-12-01

New Directions and Paradigms for the Study of Greek Architecture collects chapters by nearly three dozen scholars who describe recent discoveries, new theoretical frameworks, and applications of cutting-edge techniques in their architectural research. The contributors discuss how the recent advances in material science, new data collection methods, and sophisticated analytical techniques are changing the way we understand the history of Greek architecture. Contributors include a range of scholars from around the world, and the book is divided into three sections: the ancient environment, the archaeological record, and the ancient city.

Hellenistic and Roman Terracotta - Margaret R. Miller & M. Patrick Rice - 2013-09-01

Hellenistic and Roman Terracotta is a collection presenting previously unrecorded materials, as well as diverse and innovative approaches to the study of the imagery, function, and technology of small terracotta objects from the Mediterranean and adjacent areas. The book contains contributions from some of the leading scholars in the field, who present their latest research on a wide range of topics, including the manufacture and use of terracottas, their artistic and cultural significance, and their role in the history of Mediterranean societies.

Sicily has been the fulcrum of the Mediterranean throughout history. The island’s central geographical position and its status as ancient Rome’s first overseas province make it key to understanding the development of the Roman Empire. Yet, unlike Greece and Italy, Sicily was not thoroughly integrated into the Roman polity. This volume addresses this gap by bringing together a diverse group of scholars to explore the complex and dynamic relationship between Rome and Sicily from the Roman conquest to the present day.

Urbanism and Empire in Roman Sicily - Mary Baker & Robert Wolfe - 2010-03-01

Urbanism and Empire in Roman Sicily is a comprehensive study of Rome’s influence on the island, ranging from its conquest in 262 BC to the Arab invasions of the 7th century. The contributors explore the impact of Roman culture and institutions on Sicilian society and economy, and examine the ways in which the island’s inhabitants adapted to and resisted Roman rule. The book includes case studies of major cities, rural settlements, and rural landscapes, as well as discussions of trade, technology, and the environment.

Building a Global Community of Classical Archaeologists: New Directions and Paradigms for the Study of Greek Architecture by Pia Guldager Bilde and Vladimir F Stolba - 2005-12-01

Building a Global Community of Classical Archaeologists: New Directions and Paradigms for the Study of Greek Architecture is a collection of essays by leading scholars in the field, who discuss recent discoveries, new theoretical frameworks, and applications of cutting-edge techniques in their architectural research. The contributors examine how the recent advances in material science, new data collection methods, and sophisticated analytical techniques are changing the way we understand the history of Greek architecture. Contributors include a range of scholars from around the world, and the book is divided into three sections: the ancient environment, the archaeological record, and the ancient city.
