This volume has been developed as a step-by-step guide for professionals involved in designing, implementing, monitoring and evaluating developmental interventions. It introduces and elucidates the key concepts and procedures involved, starting from the fundamentals of project design and management, the basics of monitoring and evaluation, and the development of a performance monitoring plan to different approaches to monitoring, choosing appropriate evaluation designs, approaches to evaluation, the analysis of monitoring and evaluation, and finally implementing this information in a project environment. In order to provide further context, the manual uses real project examples which help in buttressing the understanding of the readers and enable adoption of these practices in such projects.

Environmental Planning for Site Development - Anne Beer - 2004-03-01

Environmental planning forms the basis of all site development decisions and deals with the factors that must be considered before a site plan can be drawn up. Environmental Planning for Site Development emphasizes the man/nature interface and explains how nature limits and controls what can happen on every piece of land. The text is clearly set out and will help the reader understand exactly what information is needed for a site planning proposal. The book includes a live case study to demonstrate how GIS systems are now assisting in the design and decision process as communities increasingly participate in local decisions. (Local Agenda 21)

Strategic Planning for Regional Development in the UK - Harry T. Dimitriou - 2007-08-07

With contributions from leading academics and practitioners, Strategic Planning for Regional Development in the UK is the most up-to-date treatment of a fast-changing subject. The book discusses: The evolution of regional planning in the UK and the strategic thinking involved The spatial implications of regional economic development policies The methods and techniques needed for the implementation of strategic planning for regional development How strategic planning for regional development is currently put into practice in three UK regions with different priorities Strategic Planning for Regional Development in the UK is essential reading for students and academics working within strategic and regional planning and provides policy makers and practitioners with a comprehensive and thought provoking introduction to this critically important emerging field.

The Clean Development Mechanism (CDM), a market mechanism under the Kyoto Protocol, has been successful in supporting mitigation actions through carbon inance. With nearly 7,700 projects and 290 Program of Activities registered by the CDM Executive Board, the CDM allows GHG emission reduction projects in developing countries to generate Certified Emission Reductions which can be used to oset mandatory or voluntary emission reduction targets. It however requires a robust monitoring, reporting, and veriication (MRV) to ensure social and environmental integrity of such projects and the emissions reductions thereof. This MRV manual is intended to assist CDM project developers in understanding and managing the MRV requirements and process of their CDM projects in a simple step-by-step manner with the help of real examples and practical tips. While this MRV manual has been developed primarily to assist CDM project developers, it also aspires to be of help for projects participating in other existing and emerging market mechanisms. These may include bilateral mechanisms; voluntary carbon markets; regional, national, and subnational carbon markets; and any of the cooperative approaches and new market mechanisms for the post-2020 carbon markets consequent to the Paris Agreement adopted at COP21 in December 2015. As carbon markets in the region evolve beyond CDM, there is a strong need to maintain and further build institutional capacities to ensure growth and enhanced efectivity of carbon markets--and this MRV manual is an eort in that direction.

The Development of Aid - Gerard Van Bilzen - 2015-01-12

Aid to developing countries started well before World War II, but was undertaken as an ad hoc activity or was delivered by private organizations. This changed after the War. In his Inaugural Address in 1949, the American President, Harry Truman, announced a “bold new programme for making the benefits of our scientific advances and industrial progress available for the improvement and growth of underdeveloped nations” (the so-called “Point IV” Plan). At that time it was thought that this support would be needed only for a limited number of years, comparable to the Marshall Plan assistance to Europe. But reality proved to be different: providing aid was a very long-term affair. Since the Fifties, the aid provided has changed at different occasions. In the beginning, aid concentrated on constructing infrastructure, such as roads, railways, dams, and harbours, in order to promote industrial development. In the Sixties, aid to agriculture was added, and in the Seventies aid to social sectors (Basic Needs) was also provided. The Eighties brought worldwide debt problems. Major donors applied structural adjustment policies; some called this the last decade (década perdida). The Nineties saw the arrival of the first environmental considerations, and asked for attention for the role of women and good governance. The form of aid changed from projects to programmes and budget support. Describing the different aid forms of the last 65 years and analysing why aid changed from time to time are the subjects of this book. Professionals and students in the area of international cooperation will benefit from studying this history, as, at this moment, old concepts are reappearing or applied by new donors like China. Is the pendulum really swinging back, as Louis Emmeurj at one point suggested?

Professional Development Manual - Sonia Blandford - 2003

Building an Inclusive Development Community - Karen Heinicke-Motsch - 2004

* An essential resource for all development agencies seeking to include people with disabilities * User-friendly tools and practical advice from experienced practitioners There are four hundred million people with disabilities living in developing countries today. All too often they live in poverty and isolation. If development is to truly address the needs of the poor and marginalized, the inclusion of people with disabilities is crucial. Building an Inclusive Development Community is a toolkit for development agencies and others concerned with the participation of people with disabilities at all levels and in all areas of the international development process. The manual is organized into issues and includes helpful worksheets, best practice examples, resources and much more.

IPPC Procedure manual for implementation and capacity development - May 2021 - IPPC Secretariat - 2021-05-17

The Procedure Manual for Implementation and Capacity Development is composed of six sections: Implementation and Facilitation Unit of the IPPC Secretariat, Implementation and Capacity Development Committee (IC), IC Sub-groups, Specific IC Sub-groups and additional useful procedures. The purpose of this manual is to provide a convenient consolidation of decisions, procedures, practices and forms used in the implementation and capacity development work in the IPPC community. This manual will be revised annually in November to include any new decisions and procedures and to amend existing decisions and procedures as necessary.
